Topic-by-Topic Facilitation Notes

Topic 1 — Identifying Conflicts · Slide 17

Signals · Stages · Facts and perceptions · Conflict history · Root causes · Impact

- Conflict is more than disagreement: it arises when one or more parties perceive that important needs, interests, values, roles or resources are threatened.
- Early indicators include changed communication, avoidance, cliques, repeated rework, defensive behaviour, absenteeism, complaints and declining service or output.
- The escalation path moves from latent conditions to perceived tension, felt emotion, manifest behaviour and an aftermath that can repair or reinforce the pattern.

- A fair assessment triangulates accounts, records, observations and context; it distinguishes facts from interpretations and tests alternative explanations.
- Root causes often combine task, process, relationship, status, identity, resource, value and structural factors rather than one difficult personality.
- Immediate safety, harassment, discrimination, retaliation or serious misconduct concerns require policy-led escalation rather than informal facilitation alone.

Activity 1 — Conflict Signal Triage at LionCity Retail · Slide 30

Objective: recognise early indicators, assess impact and decide the safe first response.

Method: Case study / workshop · Duration: 45 minutes · Output: A completed signal log, conflict-stage map and first-response decision.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Activity 2 — Evidence Interview and Root-Cause Map at HarborLink Logistics · Slide 38

Objective: gather and validate conflict information through neutral interviews and root-cause analysis.

Method: Case study / workshop · Duration: 55 minutes · Output: Interview notes, an evidence matrix and a multi-cause conflict map.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Topic 2 — Conflict Resolution Strategies · Slide 43

Emotional regulation · Conflict styles · Active listening · Sensitive dialogue · Negotiation · Mediation

- The five common conflict styles—compete, collaborate, compromise, avoid and accommodate—are options with different levels of assertiveness and cooperation.
- Emotional regulation comes before problem solving: notice triggers, lower arousal, check safety and agree when and where to talk.
- Active listening uses open questions, paraphrasing, validation and summaries to surface needs without implying agreement with every claim.
- Assertive communication describes observable behaviour and impact, names the need and makes a specific request without attacking character.
- Interest-based negotiation separates people from the problem, explores underlying interests, generates options and checks agreements against objective criteria.
- Use a neutral third party when direct dialogue is unsafe, stuck, affected by power imbalance or required by policy; choose facilitation, mediation, conciliation or formal investigation deliberately.

Activity 3 — Conflict Style Choice Clinic at BrightWorks Digital · Slide 55

Objective: select and justify a conflict style based on stakes, urgency, relationship and power.

Method: Case study / workshop · Duration: 45 minutes · Output: A conflict-style decision matrix with a staged response rationale.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Activity 4 — Mediated Conversation at Mosaic Creative · Slide 64

Objective: conduct a sensitive mediated conversation using active listening, validation and option generation.

Method: Case study / workshop · Duration: 60 minutes · Output: A recorded mediation role play, observer checklist and written resolution agreement.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Activity 5 — Interest-Based Negotiation at CarePoint Clinics · Slide 72

Objective: negotiate workload and service priorities using interests, options and objective criteria.

Method: Case study / workshop · Duration: 60 minutes · Output: A negotiation preparation sheet, observed role play and signed implementation record.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Topic 3 — Managing Team Conflicts in the Workplace · Slide 77

Leader accountability · Team norms · Policy · Fair process · Coaching · Productive disagreement

- Leaders set conditions for productive disagreement through clear roles, decision rights, behavioural norms, open channels and timely intervention.
- Task conflict can improve decisions when psychological safety and shared goals are strong; relationship conflict and personal attacks usually erode collaboration.
- A fair process gives each person notice, equal opportunity to speak, neutral fact-finding, confidentiality on a need-to-know basis and a documented outcome.
- Organisational policies determine reporting, investigation, support, mediation, discipline, appeal, record-keeping and escalation responsibilities.

- Conflict coaching helps team members notice patterns, reframe assumptions, choose a conversation strategy, practise language and commit to observable behaviour.
- Managers must avoid retaliation, favoritism, forced reconciliation, premature promises of secrecy and informal handling of matters that require specialist or formal action.

Activity 6 — Leader Coaching Huddle at NovaTech Services · Slide 88

Objective: coach team members to prepare and own a constructive conflict conversation.

Method: Case study / workshop · Duration: 60 minutes · Output: A completed COACH worksheet, rehearsal record and follow-up plan.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Topic 4 — Reviewing Effectiveness and Preventing Recurrence · Slide 93

Outcome measures · Follow-up · Recurrence controls · Learning reviews · Legal and ethical safeguards

- Review effectiveness against agreed outcomes, behavioural commitments, work performance, relationship quality, stakeholder impact and signs of recurrence.
- A resolution can be accepted yet ineffective; use scheduled check-ins, observable indicators and confidential feedback to test whether change lasts.
- Prevention actions may clarify roles, rebalance workload, redesign handoffs, strengthen meeting norms, train staff, improve reporting channels or revise policy.
- Document only what is necessary, accurate, authorised and proportionate; restrict access and follow organisational retention and personal-data requirements.
- Singapore guidance supports prompt grievance channels, open communication, fair treatment, trained neutral fact-finding and safeguards against retaliation.
- Serious harassment, threats, discrimination, safety or criminal concerns must be escalated to the authorised function or external authority; this course is not legal advice.

Activity 7 — Policy, Ethics and Escalation at Meridian Hospitality · Slide 105

Objective: distinguish resolvable disagreement from conduct requiring formal, confidential escalation.

Method: Case study / workshop · Duration: 55 minutes · Output: An escalation decision record, case-handling checklist and stakeholder communication plan.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Activity 8 — 30-Day Resolution Review at GreenGrid Engineering · Slide 114

Objective: evaluate resolution effectiveness and design controls that prevent recurrence.

Method: Case study / workshop · Duration: 55 minutes · Output: A 30-day effectiveness scorecard, learning review and recurrence-prevention action plan.

Facilitation: introduce the scenario and decision criteria from the slides; learners follow the detailed procedure in the Learner Guide and activity folder. Debrief against the stated check, not aesthetic preference.

Resources and Trainer Preparation

- Open the final PPTX and backup PDF; verify fonts, links, animations and presenter display.
- Provide the Learner Guide and the eight individual activity folders before each activity.
- Review role-play safety, time-out and de-role procedures; do not require disclosure of personal conflicts.
- Check the organisation's current grievance, conduct, harassment, privacy and escalation policies before discussing real cases.
- Prepare digital-attendance and TRAQOM access; keep assessment answer keys trainer-only and never display them to learners.
